### **Letter of compliance – Ingredients**

Our electrolytic nickel, electrolytic cobalt, precious metals, and sulphuric acid are not manufactured using any animal, plant, or genetically modified ingredients or residual solvents, neither in the raw material or additives in the production process. The raw materials for production are mostly metal containing nickelsubsulphidic matte from mines.

From process knowledge, I can also confirm that none of the following ingredients are present in our nickel, electrolytic cobalt, precious metals and sulphuric acid: Jatropha plant, Melamine, Gelatin, Stearic acid, DEHP, and Aflatoxins.

Due to the above confirmation of non-animal ingredients, BSE/TSE statement is not applicable for the above mentioned Nikkelverk products, and the products should comply with the Halal and Kosher requirements.

Glencore Nikkelverk has been ISO 9001 Quality certified since 1994. We are also ISO 14001 Environment certified (since 2000), ISO 45001 Health and Safety certified (since 2008), and ISO 50001 Energy (since 2016)

Regards,
